

Planetka Terms of Service

Last updated: 2026-03-26

These Terms of Service govern access to the Planetka service layer, including Planetka account login, Planetka-hosted tile delivery, and related web/API functions used by the Blender add-on.

These Terms do not replace the GNU GPL license for the add-on source code. The add-on code is licensed separately under GPL-3.0-or-later. These Terms apply to Planetka accounts, hosted services, and remote data access.

1. Acceptance

By creating a Planetka account, signing in, or using Planetka-hosted services, you agree to these Terms and to the Planetka Privacy Policy.

If you do not agree, do not create an account and do not use Planetka-hosted services.

2. Free License

The free Planetka license is:

- non-exclusive
- revocable for breach of these Terms
- tied to one specific email address
- intended for one natural person
- allowed on one computer at one time
- valid indefinitely unless terminated under these Terms

The free version is provided without any promise of future availability, continued hosting, minimum uptime, or future updates.

3. Intended Use

Planetka is intended for creating still images and animations in Blender.

That intended use includes normal interactive work such as:

- creating and resolving Earth scenes
- rendering still images
- rendering animation sequences
- normal caching required for those workflows

4. Allowed Use

Subject to these Terms, you may use Planetka-hosted services for the intended Blender rendering workflow described above.

You may keep and use your own rendered outputs, subject to any attribution or source-data obligations described in the licensing documentation shipped with Planetka.

5. Prohibited Use

You must not:

- scrape, mirror, or systematically extract Planetka-hosted source data
- use automated requests to harvest tiles or datasets outside normal rendering use
- attempt to bypass technical or account controls

- share one free license across multiple simultaneous computers or users
- use Planetka-hosted services as a generic data-delivery API
- resell, sublicense, rent, lease, or provide Planetka-hosted service access to third parties
- probe, stress, or abuse the service in a way that degrades availability
- use bots or scripts to build bulk local copies of the underlying source data
- circumvent account limits, authentication, rate controls, or enforcement logic

Any attempt to use Planetka primarily as a source-data extraction tool rather than a Blender rendering tool is prohibited.

6. Enforcement

Planetka may suspend or terminate access, block accounts, or limit requests if Planetka reasonably believes an account is being used in breach of these Terms or in a way that threatens service stability, data integrity, or other users.

Planetka may act automatically where needed for abuse prevention or service protection.

7. Account Responsibility

You are responsible for activity under your account and for keeping access to your email account secure.

You must provide a valid email address that you control.

8. No Warranty; Service Availability

Planetka-hosted services are provided on an "as is" and "as available" basis. No warranty is given that the service will always be available, uninterrupted, error-free, or suitable for any specific purpose.

For the free version in particular, Planetka gives no guarantee of continued future availability.

9. Limitation of Use Guarantee

The free version may be used indefinitely while it remains available, but that does not create any obligation on Planetka to continue hosting the service for any minimum period of time.

If Planetka later offers paid plans with support or availability guarantees, those guarantees will apply only if expressly stated in separate paid-plan terms.

10. Telemetry and Internal Analytics

Planetka may collect usage, performance, and account metrics needed to operate, secure, monitor, and improve the service.

Planetka does not sell that information and does not share it with third parties except where needed to operate infrastructure, comply with law, or protect the service.

See the Planetka Privacy Policy for more detail.

11. Outputs and Source Data

As between you and Planetka, you retain rights in your own creative rendered outputs, except where third-party source-data terms impose attribution or other

requirements.

Planetka does not claim ownership of your rendered still images or animations solely because they were created with Planetka.

When you publicly share rendered outputs made with Planetka (including social posts, videos, reels, portfolios, or client deliveries), you must include any third-party source attribution required by the source-data licenses and terms. Those attribution requirements are documented in:

- Documentation/Licencing/Attribution for User Renders.txt
- Documentation/Licencing/Compliance/*

12. Public Sharing and Planetka Credit

When sharing Planetka-based work publicly, crediting Planetka is strongly encouraged (for example: "Created with Planetka for Blender").

This Planetka credit is requested for visibility and sustainability and helps support keeping the service free long-term. It is encouraged, but not a separate third-party source-data requirement.

13. Changes

Planetka may update these Terms from time to time. Updated Terms apply to future use after publication.

14. Contact
