

Planetka Terms of Service

Last updated: 2026-04-25

These Terms of Service govern access to the Planetka service layer, including Planetka account login, Planetka-hosted tile delivery, and related web/API functions used by the Blender add-on.

These Terms do not replace the GNU GPL license for the add-on source code. The add-on code is licensed separately under GPL-3.0-or-later. These Terms apply to Planetka accounts, hosted services, and remote data access.

1. Acceptance

By creating a Planetka account, signing in, or using Planetka-hosted services, you agree to these Terms and to the Planetka Privacy Policy.

If you do not agree, do not create an account and do not use Planetka-hosted services.

2. Beta Access Model

Planetka is currently released as a **public beta**.

- Access is currently intended for beta testing and feedback.
- Access is tied to one specific email address and one computer at one time.
- Planetka may change beta limits, access rules, and feature behavior during

this beta period.

- Planetka currently offers three account tiers: **Free**, **Personal**, and

Commercial.

- For the current v0.7.0 beta phase, Planetka may run beta access in an

unrestricted mode for testing. In that mode, hosted-service access behaves as **Commercial** regardless of the stored account tier, even though the long-term product model still defines all three tiers separately.

3. Intended Use

Planetka is intended for creating still images and animations in Blender.

That intended use includes normal interactive work such as:

- creating and resolving Earth scenes
- rendering still images
- rendering animation sequences
- normal caching required for those workflows

Standard Planetka access does not include rights to use Planetka-hosted services or Planetka-provided data for artificial intelligence, machine learning, or similar model-development workflows. Those rights are available only under a separate custom license released by Planetka in writing.

4. License Scope by Account Tier

Subject to these Terms, Planetka-hosted service use is licensed per account tier as follows:

- **Free**: personal, non-commercial Blender rendering workflows only.
- **Personal**: personal, non-commercial Blender rendering workflows only.
- **Commercial**: personal and commercial Blender rendering workflows.

For clarity:

- Free and Personal do **not** include commercial use rights.
- Commercial includes commercial use rights, subject to all other Terms in this

document.

- During the current beta phase, if Planetka runs beta access in unrestricted

mode, that Commercial-equivalent beta access governs your permitted use until Planetka changes that beta-access policy.

You may keep and use your own rendered outputs, subject to attribution and source-data obligations described in Planetka licensing documentation.

5. Prohibited Use

You must not:

- scrape, mirror, or systematically extract Planetka-hosted source data
- use automated requests to harvest tiles or datasets outside normal rendering

use

- attempt to bypass technical or account controls
- share one account across multiple simultaneous computers or users
- use Planetka-hosted services as a generic data-delivery API
- resell, sublicense, rent, lease, or provide Planetka-hosted service access

to third parties

- use Planetka-hosted services or Planetka-provided data to train, pre-train,

fine-tune, adapt, align, benchmark, validate, or evaluate any artificial intelligence, machine learning, computer vision, generative, or similar model or system

- use Planetka-hosted services or Planetka-provided data to create, enrich,

prepare, transform, or supply datasets, labels, captions, embeddings, synthetic pairs, ground-truth assets, or other structured inputs primarily intended for artificial intelligence, machine learning, or similar model-development workflows

- use rendered outputs, tiles, cached files, or extracted data from Planetka-

hosted services as training material or evaluation material for artificial intelligence, machine learning, or similar systems where Planetka-hosted services or Planetka-provided data are a

material input to that workflow

- probe, stress, or abuse the service in a way that degrades availability
- use bots or scripts to build bulk local copies of the underlying source data
- circumvent account limits, authentication, rate controls, or enforcement

logic

- use Free or Personal tier access for commercial production, paid client work,

paid deliverables, resale, enterprise deployment, or other business use

Any attempt to use Planetka primarily as a source-data extraction tool rather than a Blender rendering tool is prohibited.

Artificial intelligence / machine learning use may be permitted only if Planetka releases a separate custom license for that use in writing.

6. Enforcement

Planetka may suspend or terminate access, block accounts, or limit requests if Planetka reasonably believes an account is being used in breach of these Terms or in a way that threatens service stability, data integrity, or other users.

Planetka may act automatically where needed for abuse prevention or service protection.

7. Account Responsibility

You are responsible for activity under your account and for keeping access to your email account secure.

You must provide a valid email address that you control.

You are responsible for selecting and using the correct account tier for your intended use (personal/non-commercial vs commercial).

8. No Warranty; Service Availability

Planetka-hosted services are provided on an "as is" and "as available" basis. No warranty is given that the service will always be available, uninterrupted, error-free, or suitable for any specific purpose.

Planetka gives no guarantee of uninterrupted future availability.

9. Access Continuity

Beta access is provided on an "as available" basis.

Planetka may change technical limits, anti-abuse safeguards, fair-usage protections, and beta access conditions over time to keep service available for all users.

10. Telemetry and Internal Analytics

Planetka may collect usage, performance, and account metrics needed to operate, secure, monitor, and improve the service.

Planetka does not sell that information and does not share it with third parties except where needed to operate infrastructure, comply with law, or protect the service.

See the Planetka Privacy Policy for more detail.

11. Outputs and Source Data

As between you and Planetka, you retain rights in your own creative rendered outputs, except where third-party source-data terms impose attribution or other requirements.

Planetka does not claim ownership of your rendered still images or animations solely because they were created with Planetka.

When you publicly share rendered outputs made with Planetka (including social posts, videos, reels, portfolios, or client deliveries), you must include any third-party source attribution required by the source-data licenses and terms. Those attribution requirements are documented in:

- Documentation/Licencing/Attribution for User Renders.txt
- Documentation/Licencing/Compliance/*

12. Public Sharing and Planetka Credit

When sharing Planetka-based work publicly, crediting Planetka is strongly encouraged (for example: "Created with Planetka for Blender").

This Planetka credit is requested for visibility and sustainability and helps support keeping the service sustainable long-term. It is encouraged, but not a separate third-party source-data requirement.

13. Changes

Planetka may update these Terms from time to time. Updated Terms apply to future use after publication.

14. Contact

Questions about these Terms can be sent to:

- info@planetka.io
- <https://www.planetka.io/contact-me>

Requests for AI / machine learning training rights should be sent as a custom license inquiry to the same contact details above.
